

STOLLE MACHINERY

It remains Stolle's goal to look out for the health and safety of our employees while continuing to operate our business as best that we can to serve our customers.

For now, we have chosen to operate as close as possible to normal, but with heightened caution and awareness, as well as working around any supply chain interruptions and travel restrictions. Consistent with US health guidance, we have suspended all non-essential meetings and are encouraging everyone to practice social distancing along with all of the other best practices for disease prevention. Travel will be on a strict need basis only. We continue to monitor all developments and are prepared to alter course as needed or as required to do by law.

Stolle is looking to get through this with the maximum amount of protection for our employees, fair and equitable solutions to the countless situations that will arise, and with minimal interruption to the business that we all rely on each day.
