

## Full-View Oil Sight Glass

for Stolle Standun Bodymakers

**Stolle**  
**Standun Bodymaker**  
Technical Update 1509-2

Stolle is offering a new full-view oil sight glass kit that will help machine operators quickly determine the status and clarity of the main lube system oil in their Standun Bodymakers. Swivel connectors are used to assist in an easy connection between the incoming oil hose and the filter pump inlet plumbing. Dual viewing ports provide access to background lighting which assists the operator in consistent clarity observations. A full bore size of the sight eliminates line restrictions.

This kit is compatible with all HTI Filtration Hydra-Supreme fluid scrubbing systems. This product may be ordered as an OEM item or a field retrofit kit, and is part number 095935.

### Technical Specifications:

Body: Plated steel

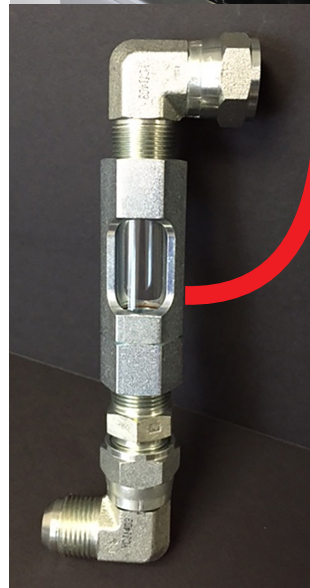

Window: Annealed borosilicate

Window Size: 1.5 in x 1 in – clear, see-through tube

Connection Male (Inlet): 90° angle JIC swivel

Connection Female (Outlet): 3/4 in, 90° angle JIC swivel
